

# Mobile GIS Solution

A GIS system delivering critical information and technology advisory to government stakeholders regularly

## About the Customer

Our customer is a leading Government Body offering information processes and technology directions to administrative units in the Middle East.

## The Business Case

As part of the goal for adopting good Governance, the customer who are providing regulatory guidance, decision support solutions and advises to administrative bodies have identified GIS as a powerful platform that facilitates the requirements of effective Decision Support System. As part of that, customer wanted to develop a tablet enabled GIS solution to act as the single gateway for providing an integrated view of GIS information of all the key decision support GIS layers on smart device platforms.

## Our Solution

Unlike other enterprise data extension, solution mandated the complete understanding of the GIS domain, ESRI ArcGIS server configuration and build up of different map layers. Algosium Software has delivered a multi platform supported GIS solution framework for supporting leading tablet platforms by leveraging the device platform SDKs and APIs offered by ESRI ArcGIS servers. Provision and flexibility has been built within the solution to get the map data feeds from different

## Solution Achievements

Solution has been very well received and accepted by the targeted user community. Being a flagship solution that the customer has come up with, they showcased the solution in the Eye on Earth summit inaugurated by Bill Clinton. Solution has received appreciation and accolades from the administrative authorities in the ME region.
